

# 5G TECHNOLOGY UPDATE REDCAP

Rohde & Schwarz Taiwan  
Clark Lin  
2023/12/15

**ROHDE & SCHWARZ**

Make ideas real

COMPANY RESTRICTED

# 5G REDCAP R17

Reduced capabilities

BWP operation

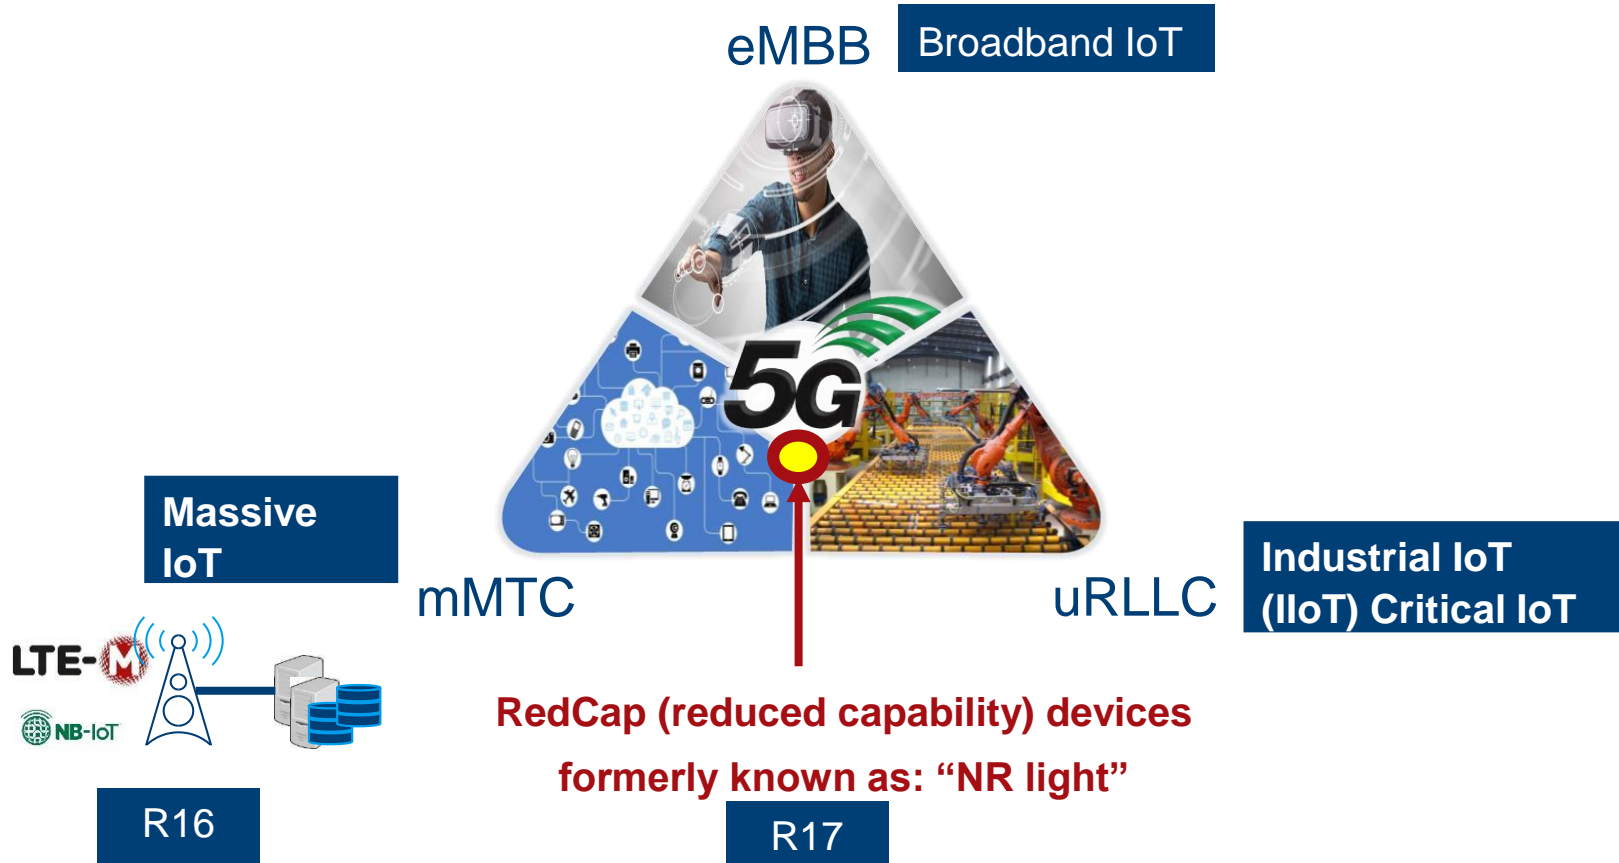

RedCap specific cell access restrictions

RedCap early indication

RRM measurement Relaxation

Power saving with eDRX

# IOT CLASSIFICATION IN 5G

# REDUCED CAPABILITY (REDCAP)

FR1 max. BW 20 MHz  
DL: 256QAM optional

FR2 max. BW 100 MHz

FR1 and FR2

- ▶ Half duplex FDD type A (full duplex optional)
- ▶ No support for: CA, MR-DC, DAPS, CPAC and IAB → **only NR-SA**
- ▶ **UE processing timeline not relaxed**

CPAC Conditional PSCell addition/change

# REDUCED CAPABILITIES

<b>Lower transmit power</b>	<b>PC7 for n257, n258, n261 with min peak EIRP 16,4 dBm</b>	
<b>number of DRBs</b>	8 mandatory	16 optional
<b>PDCP SN and RLC AM SN length</b>	12 bits mandatory	18 bits optional
<b>RRM measurement / reporting relaxation</b>	low mobility/stationary, not at cell edge → optional	
<b>256QAM FR1 DL</b>	optional (ModulationOrder)	
<b>64QAM low SE MCS tables</b>	optional (dl-64QAM-MCS-TableAlt / ul-64QAM-MCS-TableAlt)	

# REDCAP UE CAPABILITY

Definitions for parameters	Per	M	FDD TDD DIFF	FR1-FR2 DIFF
<b>longSN-RedCap-r17</b> Indicates whether the RedCap UE supports 18 bit length of PDCP sequence number. This capability is only applicable for RedCap UEs.	UE	No	No	N/A
<b>am-WithLongSN-RedCap-r17</b> Indicates whether the RedCap UE supports AM DRB with 18 bit length of RLC sequence number. This capability is only applicable for RedCap UEs.	UE	No	No	N/A
<b>supportOf16DRB-RedCap-r17</b> Indicates whether the RedCap UE supports 16 DRBs. This capability is only applicable for RedCap UEs.	UE	No	No	
<b>rrm-RelaxationRRC-ConnectedRedCap-r17</b> Indicates whether UE supports Rel-17 relaxed RRM measurements in RRC_CONNECTED as specified in TS 38.331.	UE	No	No	No

# REDCAP UE CAPABILITY

Definitions for parameters	Per	M	FDD TDD DIFF
<p><b>supportOfRedCap-r17</b>            Indicates that the UE is a RedCap UE with comprised of at least the following functional components:</p> <ul style="list-style-type: none"> <li>– Maximum FR1 RedCap UE bandwidth is 20 MHz;</li> <li>– Maximum FR2 RedCap UE bandwidth is 100 MHz;</li> <li>– Support of RedCap early indication based on Msg1, MsgA (if UE indicated support of twoStepRACH-r16) and Msg3 for random access;</li> <li>– Separate initial UL BWP for RedCap UEs;</li> <li>– Separate initial DL BWP for RedCap UEs;</li> <li>– UE-specific RRC-configured DL BWP with CD-SSB or NCD-SSB; - NCD-SSB based measurements in RRC-configured DL BWP.</li> </ul> <p>A RedCap UE shall set the field to supported.</p>	UE	CY	No

# LARGE RANGE OF REDCAP DEVICES POSSIBLE

cost, size, throughput  
power consumption

FR1 only, 1Rx, no 256QAM,  
half-duplex only.....

FR1/2, 2Rx, MIMO,  
256QAM, full-duplex.....

Capabilities

Details of impact on e.g. cost for the UE depending on features: TR 38.875

# 5G REDCAP R17

Reduced capabilities

**BWP operation**

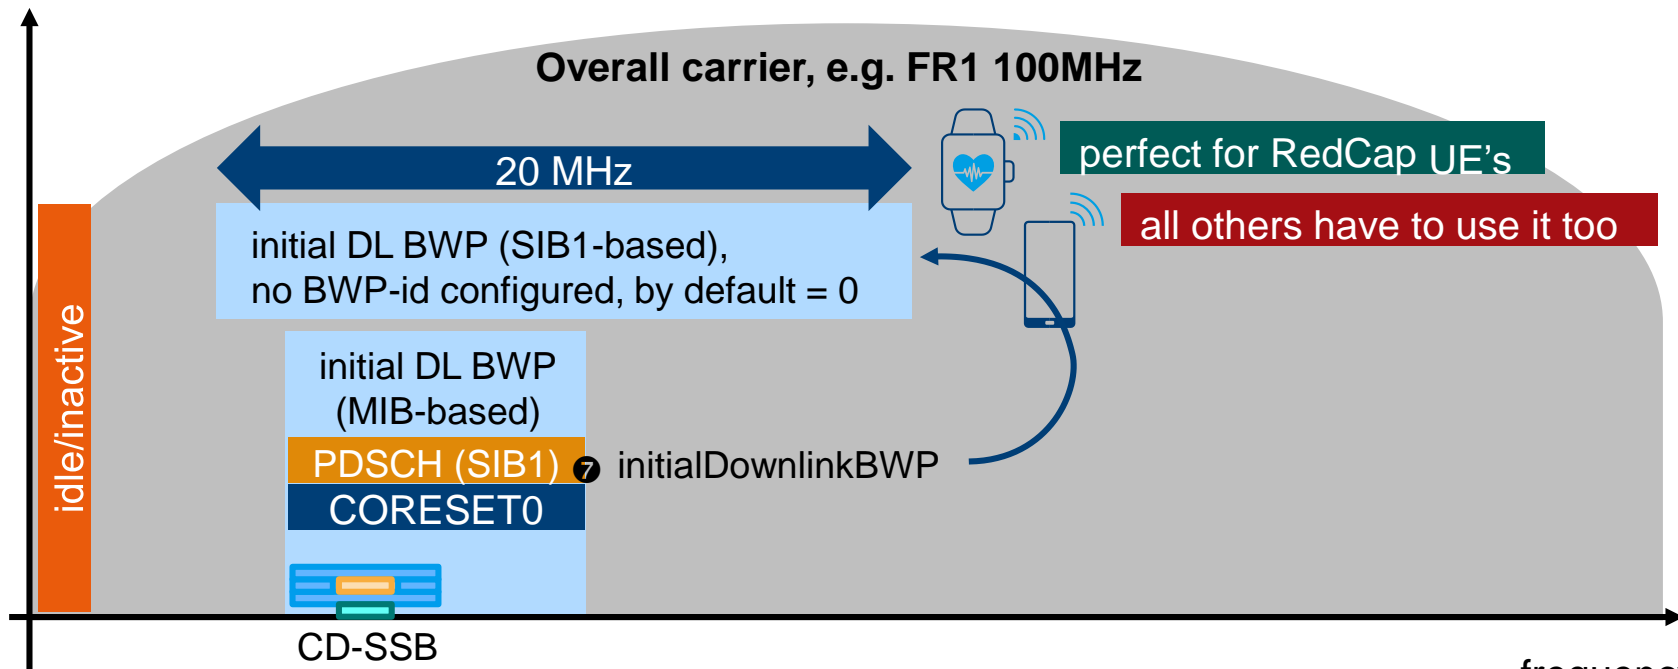

RedCap specific cell access restrictions

RedCap early indication

RRM measurement Relaxation

Power saving with eDRX

# R15 CONCEPT + R17 REDCAP UE

# 5G REDCAP R17

Reduced capabilities

BWP operation

**RedCap specific cell access restrictions**

RedCap early indication

RRM measurement Relaxation

Power saving with eDRX

SIB4

*InterFreqCarrierFreqInfo*

*redcapAccessAllowed*

# REDCAP: CELL BARRING

Scenario 1: General cell barring is active Intra

IFRI: Intra Frequency Reselection Indicator

No UE allowed to select this cell, not even for emergency calls

non-RedCap UE:

**allowed:** may re-select another cell on same frequency **not allowed:** may re-select another cell on different frequency  
RedCap UE: ignores this, uses SIB1 info instead

RedCap UE:

**allowed:** may re-select another cell on same frequency  
**not allowed:** may re-select another cell on different frequency

# REDCAP: CELL BARRING

Intra-frequency cell reselection: two-step procedure MIB / SIB1

Scenario 2: RedCap specific cell barring is active

No general access restriction activated

Not important as cell is not barred

RedCap specific cell access restrictions (1 or 2 RX, half Duplex) are activated

RedCap UE:  
allowed: may re-select another cell on same frequency  
not allowed: may re-select another cell on different frequency

# REDCAP: CELL BARRING

# 5G REDCAP17

Reduced capabilities

BWP operation

RedCap specific cell access restrictions

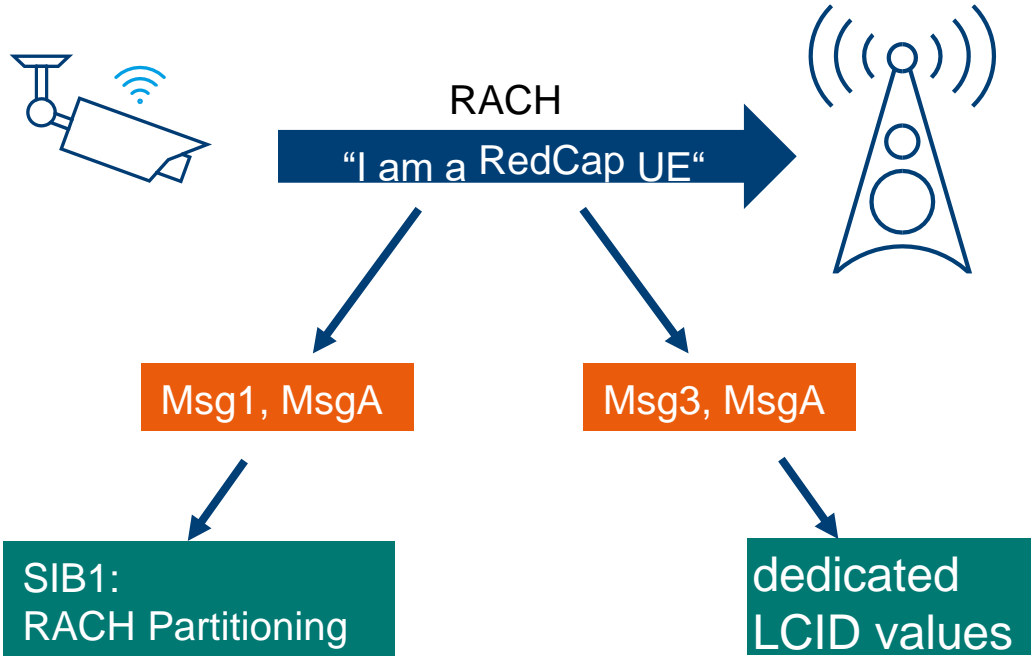

**RedCap early indication**

RRM measurement Relaxation

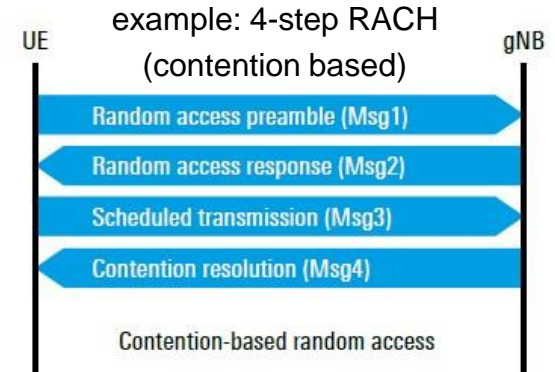

Power saving with eDRX

# REDCAP EARLY INDICATION

need to know as early as possible to not exceed the UE capabilities (e.g. max BW for BWP)

# 5G REDCAP R17

Reduced capabilities

BWP operation

RedCap specific cell access restrictions

RedCap early indication

**RRM measurement Relaxation**

Power saving with eDRX

# RRM MEASUREMENT RELAXATION STATIONARY CRITERION

## Idea:

If UE does not move, less frequent neighbor cell measurements are sufficient

“stationarity fulfilled if received power doesn’t change a lot”

# RRM MEASUREMENT RELAXATION NOT AT CELL EDGE (NACE) CRITERION

## Idea:

If UE does not move **and** is not at cell edge, even less frequent neighbor cell measurements are sufficient

$$S_{rxlev} > S_{SearchThresholdP2}$$

$$S_{qual} > S_{SearchThresholdQ2} \text{ (optional)}$$

“UE not at cell edge if power / quality is high enough”

# 5G REDCAP17

Reduced capabilities

BWP operation

RedCap specific cell access restrictions

RedCap early indication

RRM measurement Relaxation

Power saving with eDRX

# EDRX FOR RRC\_IDLE AND RRC\_INACTIVE

# EDRXFOR RRC\_IDLE AND RRC\_INACTIVE

## RRC\_IDLE

2.56s → 10485.76s (≈ 2.91 hours)

## RRC\_INACTIVE

2.56s → 10.24s

eDRX for RRC\_INACTIVE only if eDRX for RRC\_IDLE configured. eDRX cycle for INACTIVE shorter or equal to the IDLE mode eDRX cycle.

# DEMO
